"A SACS-CASI ACCREDITED SCHOOL"

Algebra IA & IB – 1.0 Credit

Course Description: Students are introduced to the foundational skills needed for more advanced mathematics courses and develop the skills needed to solve mathematical problems. Students perform operations involving numbers, sets, and variables; know the basic properties of real numbers; solve and use first degree equations and inequalities; understand functions, relations, and graphs; solve and use systems of equations and inequalities; solve problem involving integral exponents; solve problems involving polynomials and rational algebraic expressions; factor polynomials; simplify rational and irrational expressions; solve and use quadratic equations.

Algebra II - 1.0 Credit

Course Description: Students continue learning and working with the concepts of algebra including operations with matrices, relations, functions, variation, exponential growth and decay, imaginary numbers, complex numbers, logarithmic functions, quadratic equations, graphing, trigonometric ratios, and systems of equations. *Prerequisite:* Completion of Algebra 1 and Geometry with a grade of 'C' or better.

American Government - 0.5 Credit

Course Description: Students will examine important historical documents and interpret their impact on our government and society. Students learn to perform effectively as informed citizens of their community and the United States by acquiring knowledge and skills necessary for active participation in a dynamic, pluralistic and democratic society.

American History - 1.0 Credit

Course Description: Students research the chronological development of the American people by examining the political, economic, social, religious, military, and cultural events that affected the rise and growth of our nation.

American Literature - 1.0 Credit

Course Description: Students are exposed to American Literature through a variety of readings and writings such as the novel, drama, short stories, and poetry. The writings include the documented essay, persuasive writing, analytical writing, personal narrative and creative writing.

American Sign Language I – 1.0 credit

Course Description: Students are introduced to basic skills in the production and comprehension of American Sign Language, including vocabulary, grammar, fingerspelling,

numbers, terminology, history and Deaf culture. Student also develop conversational ability and culturally appropriate behaviors.

American Sign Language II – 1.0 credit

Course Description: Students continue developing receptive and expressive ability that allows recognition and demonstration of more sophisticated grammatical concepts of American Sign Language, including increasing fluency and accuracy in signing and interpretation.

Anatomy – 1.0 Credit

Course Description: Essential principles of human anatomy and physiology are presented, including an overview of all the body systems to include the organization of the human body, homeostasis and regulation, skeletal system, muscular system, integumentary system, nonspecific defenses, immune response, immune system diseases, environmental problems and human health, circulatory system, blood, respiratory system, food and nutrients, digestive system, the endocrine system, the nervous system. *Prerequisite: Completion of Biology I with a grade of C*

Biology - 1.0 Credit

Course Description: Students are introduced to the scientific method, cell biology, basic principles of genetics, biological changes through time, classification and taxonomy, structure and function of plants, structure and function of animals, structure and function of the human body, and ecological relationships.

Biology 2 - 1.0 Credit

Course Description: This course expands the study of biological concepts introduced in first year biology. The content includes; Properties of life, Application of the scientific method, Population dynamics, Species continuity, Molecular genetics, Comparative animal and plant morphology and physiology, Cellular metabolism, Classification and change through time, Careers in biological science. *Pre-requisite: Completion of Biology I with a grade of 'C' or better.*

Biology Laboratory - 0.5 Credit

Course Description: Students are introduced to the scientific method, cell biology, basic principles of genetics, biological changes through time, classification and taxonomy, structure and function of plants, structure and function of animals, structure and function of the human body, and ecological relationships.

Chemistry - 1.0 Credit

Course Description: Students investigate the composition of matter and the physical and chemical changes it undergoes. Students use science process skills to study the fundamental structure of atoms, the way atoms combine to form compounds, and the interactions between matter and energy.

Civics - 0.5 Credit

Course Description: Civics provides a comprehensive background for the understanding of United States citizenship and the foundations and operation of American government. Students will apply this understanding to current event topics relevant to our nation and election issues. This course will emphasize civic participation by the students.

Economics - 0.5 Credit

Course Description: Students are involved in discovering the definition of economics, the concept of scarcity, supply and demand, resource allocation, institutional and governmental effects on consumer behavior, unemployment, regional, national and global competitive situations, the economic cycle, and the production of goods and services by industry and government.

Consumer Mathematics - 1.0 Credit

Course Description: Students apply computational skills to real-world consumer application situations, including the purchase of goods and services, the cost of credit, the sale of goods and services, banking services, investments, personal income and taxes, budgeting, automobile ownership, commercial transportation, housing and retirement.

Earth Space Science I - 1.0 Credit

Course Description: Students use the scientific method to solve problems, describe and compare scientific theories of the origins of the universe, identify the layers of the earth's interior, distinguish formation of old and new mountains and rivers, describe the types of erosion its consequences, learn the hydrological cycle, understand the geological time frame, identify various fossil types, describe the earth/moon relationships, identify methods used to harness and conserve renewable and non-renewable resources, practice map skills and recognize how the earth sciences interact and reflect the advances in technology and society.

English 1A & 1B - 1.0 Credit

Course Description: Students are actively engaged in language studies through guided writing practical exercises for mastering English grammar, mechanics, grammar, usage, and structure in preparation for research based writing assignments.

English I Honors - 1.0 Credit

Course Description: This is an accelerated course in which students think deeply about both fiction and non-fiction from classic and contemporary works. A heavy emphasis is placed on a variety of writing skills for a rigorous and active experience. Language study continues through the application of rules for sentence formation, usage, spelling, and mechanics. Students apply their understanding of grammar, capitalization, punctuation, spelling, sentence structure, and paragraphing to varied and frequent writing assignments.

English II - 1.0 Credit

Course Description: Students engage in various integrated language arts activities to include reading, writing, speaking, listening, language, and literature in preparation for college and career readiness. Students develop writing skills through guided creative and practical writing activities and compositions. Language study continues through the application of rules for

sentence formation, usage, spelling, and mechanics. Students apply their understanding of grammar, capitalization, punctuation, spelling, sentence structure, and paragraphing to varied and frequent writing assignments.

English II Honors - 1.0 Credit

Course Description: Students will improve their reading skills, especially in vocabulary, attention to detail, identifying theme and tone, and analyzing the effect of literary techniques on meaning. The writing focuses on content, organization, style, complex sentence structure, and conventions. Students also practice revising work and develop presentation projects in multi-media formats.

English III - 1.0 Credit

Course Description: Students compose readers' responses that demonstrate a thorough analysis to a variety of classical literature selections, including knowledge of literary techniques that affect the meaning of a literary work. Language study continues through the application of rules for sentence formation, usage, spelling, and mechanics. Students apply their understanding of grammar, capitalization, punctuation, spelling, sentence structure, and paragraphing to varied and frequent writing assignments.

English III Honors - 1.0 Credit

Course Description: Students read and analyze a variety of literary and nonfiction texts, comparing themes of various works and analyzing expository materials to draw conclusions. Language study continues through the application of rules for sentence formation, usage, spelling, and mechanics. Students apply their understanding of grammar, capitalization, punctuation, spelling, sentence structure, and paragraphing to varied and frequent writing assignments. With an emphasis on persuasive writing, students apply their skills and adapt content, vocabulary, voice, and tone to a specific audience and purpose. In the research process, students analyze, evaluate, synthesize, and organize information from a variety of sources to produce a research product. Students also refine their communication skills through gathering and organizing evidence to support a position in informative and persuasive multi-media presentations.

English IV - 1.0 Credit

Course Description: Students develop a foundational understanding of contemporary literature through integrated educational experiences in the language arts strands. Emphasis will be on works of major contemporary authors, representing various cultures, whose writings reflect the characteristics, problems, and themes of modern culture and society.

English IV Honors - 1.0 Credit

Course Description: Students read and analyze a variety of literary texts, recognizing major forms and their stylistic elements. Using nonfiction texts, students will analyze and synthesize information to solve problems. Writing includes the production of informational, expository, and persuasive/argumentative papers, logically organized demonstrating knowledgeable judgments, and effective conclusions. Students apply their communication skills to create multi-media presentations and analyze the relationships among purpose, audience and content of presentations.

Environmental Science - 1.0 Credit

Course Description: Students develop elementary concepts about man's interaction with the environment, including technology, air, water, and land pollution, conservation of natural resources, and society's impact on the environment.

Essay Writing - 0.5 Credit

Course Description: Students follow a prescriptive writing process to fully develop essay writing skills on a chosen topic given specific criteria. Students use fundamental writing and language skills for creative expression in an essay format.

French 1 - 1.0 Credit

Course Description: Students begin to acquire proficiency in French through a linguistic, communicative, and cultural approach to language learning. Emphasis is placed on the development of listening, speaking, reading, and writing skills and on acquisition of the fundamentals of applied grammar. Cross-cultural understanding is fostered and real-life applications are emphasized throughout the course.

French 2 - 1.0 Credit

Course Description: Students enhance proficiency in French through a linguistic and cultural approach to language learning. There is continued emphasis on the development of listening, speaking, reading, and writing skills and on acquisition of the fundamentals of applied grammar. Cross-cultural understanding is fostered and real-life applications are emphasized throughout the course.

Geometry – 1.0 Credit

Course Description: Students experiment with transformations in the plane, understand congruence in terms of rigid motions, prove geometric theorems, make geometric constructions, understand similarity in terms of similarity transformations, prove theorems involving similarity, understand and apply theorems about circles, find arc lengths and areas of sectors of circles, explain volume formulas and use them to solve problems, visualize relationships between two-dimensional and three-dimensional objects, and apply geometric concepts in modeling situations by using traditional and real world mathematical practices.

Global Studies – 1.0 Credit

Course Description: Students conduct research that promotes an understanding of global awareness and the interconnectedness of the global human population as well as its dynamic interactions with the natural world. This requires an appreciation of the interconnectedness of global and local events, processes and structures. Toward this end, students examine a range and diversity of global topics.

Humanities – 1.0 Credit

Course Description: Students demonstrate knowledge of how culture is expressed through visual and performing arts; analyze how historical events shape the development of culture; how ideas and beliefs, decisions, and chance events have been used in the process of writing and interpreting history; synthesize information from multiple sources to draw conclusions, and identify personal artists they feel have contributed to the broad field of humanities.

Introduction to Art History - 1.0 Credit

Course Description: Students develop an appreciation of art through the sequential study of art history and theory. Students use skills of visual analysis to critique masterworks using the elements of art and principles of design. This includes art vocabulary and visual language; major artists, architects, and masterworks; elements of art and principles of design; critical thinking and visual analysis; role, impact, and reciprocal relationships of art in history, culture, and society; Information resources and strategies; personal and social benefits; community resources; career opportunities.

Journalism I – 1.0 Credit

Course Description: Through practical applications, students develop fundamental skills in the production of print or electronic journalistic media using AP guidelines.

Journalism II - 1.0 Credit

Course Description: Students enhance their skills in the production of print or electronic journalistic media following AP guidelines.

Life Management - 1.0 Credit

Course Description: Students identify and learn to apply coping skills to manage daily stress and build positive relationships at home and in the workplace.

Mathematics Explorations 1- 1.0 Credit

Course Description: Students strengthen the foundational computational skills needed to develop problem-solving skills.

Mathematics for College Readiness - 1.0 Credit

Course Description: Students will engage in a review of the most common concepts on college placement tests. *Pre-requisite: Completion of Algebra 1 and Geometry with a grade of 'C' or better.*

Outdoor Education - 1.0 Credit

Course Description: Students acquire knowledge of the history and purpose of outdoor education, develop skills in outdoor education activities (hiking, biking, orienteering, water sports, team sports, or others as approved by the school) and maintain or improve health-related fitness. This course will meet graduation requirements for Physical Education.

Personal and Family Finance - 1.0 Credit

Course Description: Students learn the concepts of personal and family financial management that includes money management, saving and investing, spending and credit, the role of financial institutions and the consumer, consumer information and taxation and financial planning.

Photography - 1.0 Credit

Course Description: Students explore the aesthetic foundations of art making using beginning photography techniques that include color and/or black and white photography via digital media and/or traditional photography. Students become familiar with the basic mechanics of a camera, including lens and shutter operation, compositional foundations, and evaluating a successful

print. Craftsmanship and quality are reflected in the surface of the prints and the care of the materials. This course incorporates hands-on activities and consumption of art materials.

Physical Science - 1.0 Credit

Course Description: This course explores the physical world, focusing on the interaction of matter and energy, real life applications, utilizing the scientific method and the process of science. Students will gain the skills needed to be successful in Chemistry and Physics.

Psychology - 1.0 Credit

Course Description: Students acquire an understanding of the foundations of psychology theories and an appreciation for human behavior; behavior interaction and the progressive development of individuals that helps them better understand their own behavior and the behavior of others.

Reading 1 - 1.0 Credit

Course Description: Students develop and strengthen reading skills through integrated experiences in the language arts strands using classical and contemporary literature selections.

Research I - 1.0 Credit

Course Description: Students research and prepare research reports that reflect the skills needed for writing college freshman level papers and compositions.

SR Capstone 1 - 1.0 Credit

Course Description:

Social Studies: Students will identify and describe important American historical documents and interpret their impact on our government and society through a research based writing project.

Language Arts: Students demonstrates college ready writing skills mastery of *expository, narrative, and persuasive* writing by composing a series of essays on specific writing prompts.

SR Capstone 2 - 1.0 Credit

Course Description:

Mathematics: Students apply computational skills to real-world consumer application situations, including the purchase of goods and services, the cost of credit, the sale of goods and services, banking services, investments, personal income and taxes, budgeting, automobile ownership, commercial transportation, home ownership, and preparing for retirement through a research based application project.

Environmental Science: Students demonstrate knowledge of the elementary concepts about man's interaction with the environment, including technology, air, water, and land pollution, conservation of natural resources, and society's impact on the environment through a research based project.

Service Learning I - 1.0 Credit

Course Description: Students are provided an introduction to service learning and identify opportunities for leadership in the areas of service-learning and civic responsibility. Academic,

personal, and career skills needed for effective service-learning project implementation will be applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 30 hours' duration.

Service Learning II - 1.0 Credit

Course Description: Students continue their participation in their community service activities demonstrating their leadership abilities in the areas of service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation are applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 40 hours' duration.

Sociology - 1.0 credit

Course Description: Students engage in the analysis of the social contexts; groups, neighborhoods, cities, and whole societies in which thoughts, feelings, beliefs, ideas and norms are formed, learning how people function within these societal norms. Using sociologists' tools, students learn to observe, describe, analyze, and sometimes predict people's behavior in certain situations and conditions.

Spanish 1 - 1.0 Credit

Course Description: Students to begin to acquire proficiency in Spanish through a linguistic, communicative, and cultural approach to language learning. Emphasis is placed on the development of listening, speaking, reading, and writing skills and on acquisition of the fundamentals of applied grammar. Cross-cultural understanding is fostered and real-life applications are emphasized throughout the course

Spanish 2 - 1.0 Credit

Course Description: Students enhance proficiency in Spanish through a linguistic and cultural approach to language learning. There is continued emphasis on the development of listening, speaking, reading, and writing skills and on acquisition of the fundamentals of applied grammar. Cross-cultural understanding is fostered and real-life applications are emphasized throughout the course.

Trigonometry – 1.0 Credit

Course Description: Trigonometry topics include circular functions, right triangle ratios, solving trigonometric equations, inverses, identities, the Laws of Sines and Cosines, graphing trigonometric functions, and applying trigonometric techniques to solving real-world problems.

Workplace Essentials - 1.0 Credit

Course Description: Students learn and demonstrate the introductory skills essential for gainful employment, including applications, resumes, interviewing skills, follow up, and appropriate business communications.

World History - 1.0 Credit

Course Description: Students are engaged in the study and research of ancient and modern civilizations, societies, and historical periods leading to the beginning of the 21st Century to build a foundation for understanding the human history across different cultures and civilizations. Emphasis will be placed on the interaction among world cultures, the linking of the past and present, and the importance of the relationship of geography and history.

World Literature - 1.0 Credit

Course Description: This course employs a thematic approach to the study of literature. The development of the hero in literature is traced. Works are read in their entirety and typically include The Odyssey, Gawain and the Green Knight, Oedipus, the King, and Hamlet. Students write literary analysis papers and create multi-media presentations. The mechanics of writing are presented through a prescriptive approach in relation to specific writing tasks. Students are expected to generate their own topics and to write with absolute voice and style. Assignments may include a persuasive essay, classification, cause and effect, and definition.
